+234 901 900 8187

Highly motivated and detail-oriented software engineer skilled with a strong foundation in software development and programming. My expertise includes developing and maintaining complex software applications, writing clean and efficient code, and designing and implementing software solutions that meet business needs. I am a dynamic learner with the ability to rapidly master new technologies and programming languages. Additionally, I possess excellent communication skills and creative talent for cultivating rewarding relationships.

Work Experience

Senior Associate, System Admin

eHealth Africa - Abuja

December 2023 to Present

- Administered and maintained the Odoo system, ensuring optimal performance and addressing staff requirements.
- Provided technical support and troubleshooting expertise to enhance system reliability and user experience.
